

Texas Commission on Environmental Quality
Exemption §106.148 Checklist
(Previously Standard Exemption 112)
Railcar or Truck Unloading Facilities

The following checklist has been developed so the Texas Commission on Environmental Quality (TCEQ) can confirm that you meet Exemption requirements. The questions are derived from § 106.4, previously § 116.211(a), and the exemption list. Please read all questions and check "YES" or "NO" (equivalent to True or False), or give specific information as applicable to your facility. If you do not meet all conditions of a specific exemption, you will not be allowed to operate the facility under exemption and you must apply for a construction permit as required under § 116.110(a) prior to construction.

For additional assistance with your application, including resources to help calculate your emissions, please visit the Small Business and Local Government Assistance (SBLGA) webpage at the following link:

www.TexasEnviroHelp.org.

Please check the most appropriate answer	
1. This facility unloads wet sand, gravel, aggregate, coal, lignite, and scrap steel (but not including metal ores, metal oxides, battery parts, or fine dry materials) into trucks or railcars for transportation to other locations?	☐ YES ☐ NO
2. Bulk materials shall not be stored on-site.	☐ YES ☐ NO
3. Water sprays or the equivalent are installed and used as necessary at material handling operations to achieve maximum control of dust emissions	☐ YES ☐ NO
4. All permanent in-plant roads and vehicle work areas will be paved and cleaned?	☐ YES ☐ NO
5. All permanent in-plant roads and vehicle work areas will be oiled?	☐ YES ☐ NO
6. All permanent in-plant roads and vehicle work areas will be treated with dust-suppressant chemicals?	☐ YES ☐ NO
7. All permanent in-plant roads and vehicle work areas will be sprinkled with water.	☐ YES ☐ NO
